ETHPrague wants to hack for good, and shape a brighter future

This year's community-driven Ethereum conference and hackathon will bring together top minds from throughout the web3 landscape.

Prague, Czech Republic, Jun 4, 2022 — ETHPrague is a different kind of hackathon. This year's summit, taking place on June 10-12, 2022, and organised by Paralelni Polis' Institute of Cryptoanarchy, aims to tackle challenges and issues which are likely to arise throughout the course of the next decade. The event's organisers are firm believers that Ethereum will play a key role in solving these issues.

Embracing Solarpunk philosophy

ETHPrague organisers crafted the hackathon with values of *openness*, *community*, and *freedom* in mind. Today, the summit exists as a cooperative space in which participants can build solutions that cultivate a community-driven mindset, and in doing so, push society toward a brighter future.

Since its inception, the event has proudly maintained its cultural identity. "ETHPrague takes place right at the heart of Europe. Prague is at the crossroads of where east and west collide, and in the face of many global influences, the city has maintained a sense of radical authenticity. We are proud to support this ethos through the production of a unique event like ETHPrague," said Chris Hobcroft, a member of the ETHPrague Team.

The goal of ETHPrague is much more than a search for the next "get rich quick" scheme, jpg indexing system, or groundbreaking DeFi app. By taking part in the hackathon, ETHPrague attendees are invited to play an active role in determining whether we end up living in an authoritarian dystopia or a bright Solarpunk utopia.

What to expect at this year's event

Come ready to dive deep into all things web3: ETHPrague speakers, judges, and mentors will be exploring topics related to social coordination, sustainability, responsible use of technology, circular economies, and how DAOs and tokenisation may be utilised.

Not only will there be various types of workspaces and networking opportunities available at the event, but attendees can also look forward to the following activities:

- Informative Solarpunk-related and technical talks
- A variety of hands-on workshops
- A selection of panels and fireside chats

Furthermore, as there will not be any sponsored tracks at the event, ETHPrague judges will evaluate projects against six domains: sustainability, urbanism, cryptoeconomics, design, smart contract and hackers' favourite. Winners in each domain will be announced during the closing ceremony, and will be awarded €2,500, plus a unique crafter trophy.

ETHPrague sponsors and partners

This year's summit is backed by an array of innovators in the web3 space, namely:

- Looks rare: PWN, UniGrants, and Moralis
- Few: WalletConnect, the Ethereum Foundation, Livepeer, Ledger, Element Finance
- Frens: Boba, Golem Foundation, Wintermute, ChainSafe, ETHSwarm, Connext, NodeReal and StarkWare
